SYSTEM ADVANTAGE

AWNINGS & VERANDAS

Maximum strength and durability

The **belt arm** system, featured in the Classic Plus, Classic XL, Monobloc Plus, Cofre Plus, Cofre XL and Cofre Style models, extends the lifespan of awnings by up to three times.

- Designed to last up to 30,000 cycles.
- Made with highly durable stainless-steel cables coated in PPU plastic tape, with anti-corrosion treatment and UV protection.

A stylish, functional design also conceals support cables beneath the belt.

Flawless fabric retraction

The **rollertube*** system ensures wrinkle-free fabric rolling by incorporating an innovative eyelet design.

*Available for the Classic Plus, Classic XL, Monobloc Plus, Cofre Plus, Cofre Style, Cofre XL, Projection Plus, Veranda Plus, Veranda Floor and Veranda Zip models.

WITH

WITHOUT

Outstanding rainwater protection

The **terminal with integrated drainage**, available on the Classic XL, Monobloc Plus, Cofre Plus, Cofre Style and Cofre XL systems, effectively channels rainwater to prevent accumulation.

Its rounded design includes two eyelets for drop curtain installation if required. The upper eyelet allows the curtain fabric to partially cover the bottom rail, while the lower eyelet keeps another part of it visible. The drainage system spans the entire width of the bottom rail, redirecting water towards the ends to avoid "sheets of water" from forming.

Convenient one-click operation

All Bandalux awnings can be motorized for effortless operation. Extending or retracting the awning is as simple as pressing a button on the remote control.

Our range includes the quietest and most durable cable and radiofrequency motors available on the market, including the Bandalux range and Somfy® RTS and IO models, along with a wide selection of emitters, sensors and programmers.

Quick and easy installation

Bandalux awnings are delivered fully assembled, with the limit switches pre-adjusted to simplify the installer's work and significantly reduce installation time.

COFRE PLUS

This cassette-based retractable arm awning features fixed lateral supports and anchoring brackets for straightforward adjustment and installation. Made entirely of lacquered aluminum, it guarantees durability and a sleek appearance.

Wall or ceiling
installation

Prevents the "sheet of
water" effect*

❗ * Features an integrated drainage system that redirects rainwater to the ends, avoiding accumulation along the width of the bottom rail and the "sheet of water" effect.
